

What's new for Climate City Operator ?

EDITO

Earth2Orbit CEO **Susmita Mohanty** is on the cover of this month's issue of Fortune India. We're proud to say this exceptional and multitalented woman is one of our main partners. **CLIMATE CITY** is depending to a large extent for its international development on specific markets with big climate challenges. India, the world's second most populous nation, is one of them. This partnership therefore offers a great opportunity to break into the Indian market and to develop our airborne system.

OFFICIAL AGREEMENT SIGNED WITH HAUTS-DE-FRANCE REGIONAL COUNCIL AND MÉTROPOLE EUROPÉENNE DE LILLE (MEL)

Monday 19 June at the International Paris Air Show, **Benoît Bazire**, Chair of CLIMATE CITY's Strategic Committee, signed a statement of intent with **Xavier Bertrand**, President of the Hauts-de France region, and **Damien Castelain**, President of MEL, the Lille interborough council. The goal of this partnership agreement is to deploy a C-Birds One demonstrator over Lille and to locate a research and operations centre in the region. This signature marks a key milestone for CLIMATE CITY, which is set to deploy demonstrators in a number of cities around the world this year, including Bangalore, Le Havre, Abidjan and New York. Lille will thus be the first city equipped with this system capable of modelling urban microclimates.

In addition to this event at the start of the Paris Air Show, **CLIMATE CITY** held a conference in the pavilion of the French space agency **CNES** on **Wednesday 21 June**, where it presented its project alongside Earth2Orbit CEO Susmita Mohanty, who it was introduced to early last year through CNES.

Xavier Bertrand,
President of the Hauts-de-France regional council,
Benoît Bazire,
Chair of CLIMATE CITY's Strategic Committee
and Laurent Husson,
Co-founder and CEO of CLIMATE CITY

Susmita Mohanty,
CEO of Earth2Orbit,
Philippe Jouteux,
CLIMATE CITY Partner and VP Development
Laurent Sauvage,
CLIMATE CITY Partner and VP Innovation and Science
Yves Tourre,
CLIMATE CITY Co-Founder and Co-chair of Scientific Steering Committee

CLIMATE CITY RECEIVES BACKING FROM CRÉDIT AGRICOLE'S LE VILLAGE BY CA OPEN INNOVATION NETWORK

Mathilde Lorenzi, CLIMATE CITY's Expert member of the Strategy Committee Advisor in charge of institutional relations and public affairs was interviewed by 01netTV at Le Village by CA in Paris.

CLIMATE CITY is working with the **Columbia Water Center** (CWC) in preparation to deploy a future **demonstrator in New York**. During a mission to the United States, it discovered a global network dedicated to open innovation called Le Village by CA.

The 'villages' in the network are backed by the regional agencies of French bank Crédit Agricole and are present in 25 large cities around the world, including New York. Some months after this encounter, CLIMATE CITY applied to join and was selected alongside six other start-ups from a field of 120 candidates.

The firm will now be receiving support from Le Village by CA over the next two years to pursue its international development.

CITIZEN KLIMATE WEB SERIES TO RAISE AWARENESS OF CLIMATE ISSUES

CLIMATE CITY is in the process of setting up a **sponsoring programme to raise awareness of climate issues**, materialized through the first season of its **CITIZEN KLIMATE web series**. This series stems from CLIMATE CITY's desire to bring urban climate challenges to a broader public and reflects its outreach approach geared towards finding ways to make our world a better place to live in. The first two pilot episodes on The Smart City revolution and Adapting cities were filmed in Quebec early this year.

They can now be viewed through certain channels, notably on the website of AIMF, the international association of French-speaking city councils.
